

Swan

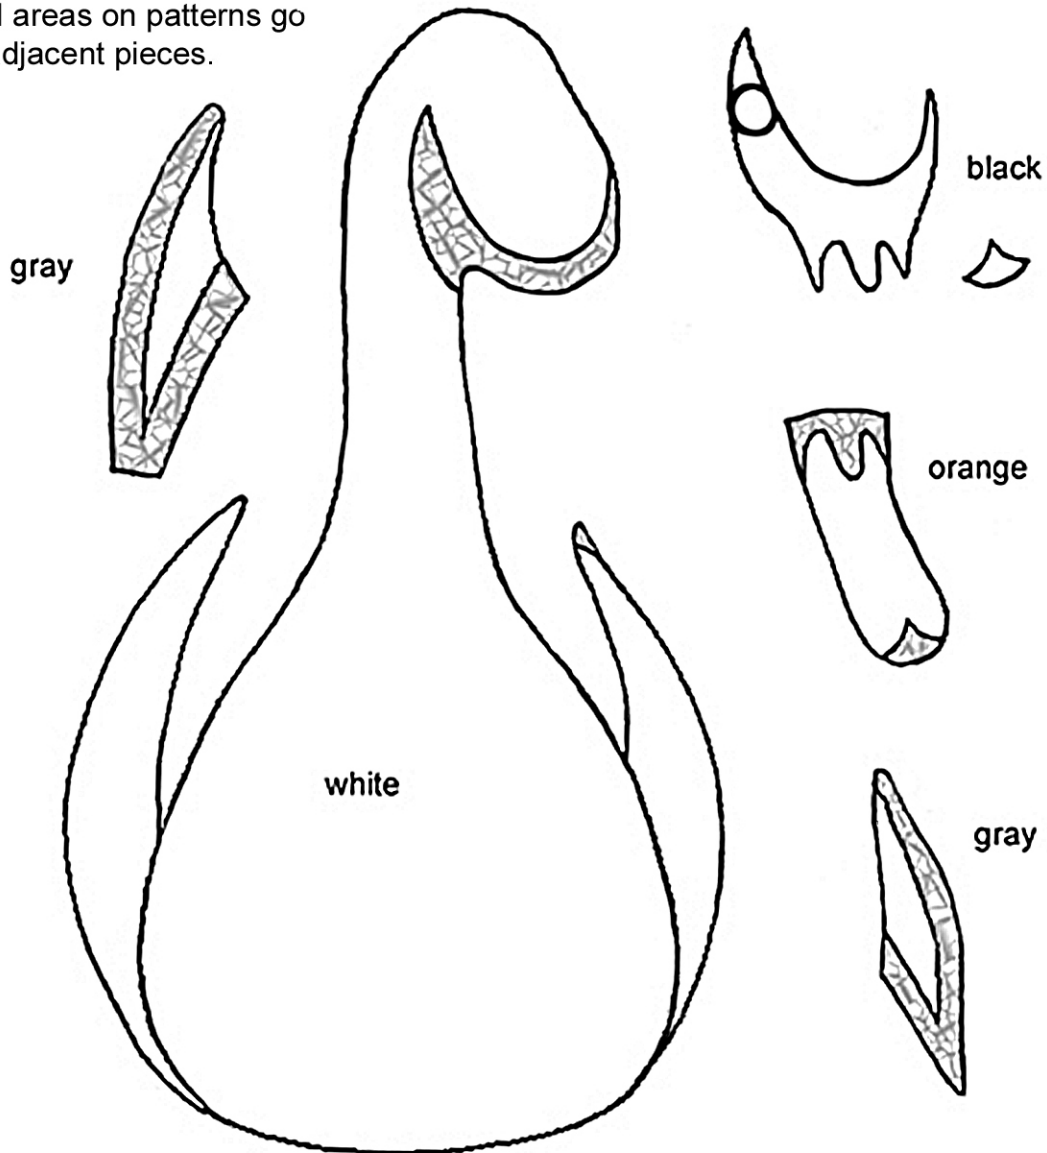

Swan

Cut the swan from white fabric. If desired, back with a layer of lightweight white fusible interfacing.

Cut the shadowed parts of the wings in light grey, the beak in orange, and the face detail in black or dark gray.

After fusing, satin stitch all edges and detail lines. Add the eye with embroidery or a button.

Shaded areas on patterns go under adjacent pieces.

If needed, more complete directions are given for fusible applique technique on the Basic Directions page, and may be printed out.
