

Waterlily

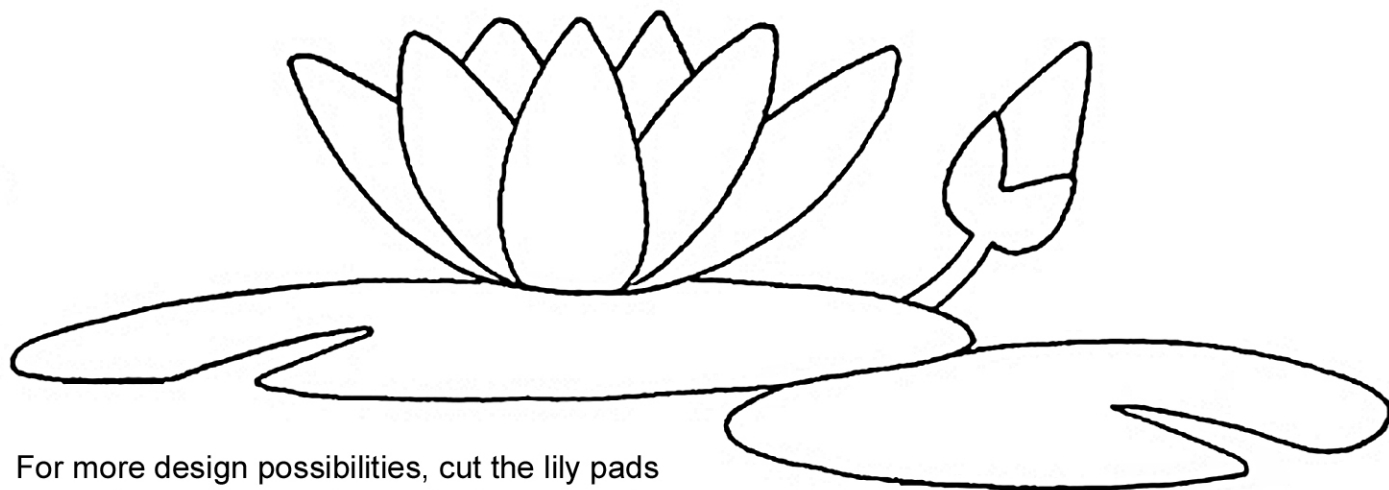

Cut the 2 waterlily pads and bud stem in one piece of green.

Make the flower and bud in white, pink or yellow, with the two back petals in a darker shade.

Shaded areas go behind adjacent pieces.

Satin stitch all edges and detail lines.

If needed, more complete directions on the fusible applique technique may be found on the Basic Directions page.

For more design possibilities, cut the lily pads separately, and group the pads, flowers and buds in varying numbers. These with the swans would work well on a row quilt.
